EDUCATION

New York Institute of Technology

2016 - 2020

Bachelor of Computer Science

EXPERIENCE

Zensoft IO, Back End Developer Intern

Jun 2019 - July 2019

- Built APIs for content management workflow.
- Collaborated with frontend engineers to develop server-side solutions.
- Developed services to retrieve and send user data to PostgreSQL databases.

Planet Classroom, Web Dev & Management Intern

Sep 2020 - Nov 2020

- Built web pages using Wordpress.
- Wrote new, and modified existing code using HTML and CSS.
- Designed new features and interfaces using Figma.
- Customized themes to meet stakeholder requirements.
- Introduced new plugins and extensions to make website more usable and interactive.

Heali AI, UI / UX Designer

Nov 2020 - Present

- Gathered and evaluated user requirements in collaboration with product managers and UX researchers.
- Optimized existing UI designs.
- Developed UI mockups and prototypes for new ideas that clearly illustrated how app will look and function.
- Conducted layout adjustments based on user interviews and feedback.
- Delivered UI specifications, wireframes, and prototypes across product design and engineering teams.

PROJECTS

Stock Prediction App, iOS

Oct 2019 - Dec 2019

- Designed UI mockups that focused on simplicity and usability.
- Worked with APIs to create a currency converter, retrieve relevant news articles, and any stock related information (open and close prices, highs and lows, and others).
- Integrated a Python script that took into account, a stock history ranging 4 years, and produced a predicted opening price.
- Developed using Swift.

Senior Project - Fitness App, iOS

Feb 2020 - May 2020

- Implemented Google Firebase as cloud storage (meal / calorie tracker, user health data, fitness goals, etc) and user-authentication purposes.
- Calculated user's BMI using data users filled in during the onboarding process.
- Integrated Apple HealthKit to retrieve calories user had burned, steps and distances user had travelled, as well as daily, weekly, monthly, and yearly averages.
- Developed using Ionic, Angular JS, and HTML.
